WATERS LYING ADJACENT TO MARINA FACILITIES

The following areas are classified as restricted:

All the waters lying within the confines of any marina are restricted for the harvesting or storing of shellfish. Also, all waters lying adjacent to marina facilities located in shellfish waters of the State and capable of accommodating ten (10) or more vessels are restricted for the harvesting or storing of shellfish between May 1st and September 30th of each year. These restrictions will include that area beyond a marina facility based on the following table:

<u>Number of Slips</u>	<u>Distance of Restriction Beyond Marina</u>
10 - 50	100 feet
51 - 100	150 feet
greater than 100	200 feet

These areas will be reopened to shellfish harvesting each year between October 1st and April 30th. Any individual owning a marina facility may request a variance for the size of the zone described above in accordance with the marina policy adopted by the Department on August 10, 1987. Anyone desiring additional information concerning this policy may call MDE, Science Services Administration at (410) 537-3906.

These restricted areas are established as part of Maryland's participation in the National Shellfish Sanitation Program. Under this program, these areas, while not necessarily containing polluted water or shellstock, are restricted as a precautionary measure to assure that only safe, marketable shellstock will be harvested.
